

ENERGY POLICY

At **Medicamen Biotech Limited**, we are committed to continually improve our Products, Processes and Services while demonstrating excellence in Energy Management performance by:

- **Complying** with all the applicable legal and other requirements related to energy efficiency, energy usage and energy consumption without compromising on productivity, quality and safety.
- **Ensuring** the availability of information, incorporating innovative energy efficient designs and technologies in all projects and periodically upgrading processes for achieving targets.
- **Supporting** the procurement of energy-efficient products, services and designs for energy performance improvement.
- **Establishing** & Reviewing the energy management systems, objectives and energy targets to ensure effectiveness.
- **Documenting & Communicating** our Energy Management System Policy at all levels within the organization and ensuring availability to all interested parties.

This Energy Management System policy shall be reviewed and updated periodically to meet the changing needs of all interested parties and to reduce our carbon footprint globally.
